RAJALAKSHMI ENGINEERING COLLEGE An AUTONOMOUS Institution Affiliated to ANNA UNIVERSITY, Chennai	Continuous Assessment Test-I [CAT -I] Year : II Semester :IV Branch : B.E Computer Science and Engineering Sub. Code : CS23A34 Subject Name : User Interface Design QP Code : 021072

[Regulations 2023]

Date: 11.03.2025 Time : 120 Min Max. Marks : 75

Answer All Questions

Part A: 10 x 2 = 20 Marks

1	What is the purpose of a user interface?	[CO1]	[A1]
2	Define 'chunking' and its relevance in UI design.	[CO1]	[A2]
3	Contrast recognition with recall in the context of UI design.	[CO1]	[A2]
4	Why is consistency considered crucial in user interface design?	[CO1]	[A2]
5	Describe a direct manipulation interface with an example.	[CO2]	[A1]
6	What is the first step in the UI design process according to lifecycle models?	[CO2]	[A2]
7	Explain the significance of the Star lifecycle model in UI design.	[CO2]	[A2]
8	How do lifecycle models aid in UI design?	[CO2]	[A2]
9	What role does 'feedback' play in GUI design?	[CO3]	[A2]
10	Define the term 'widget' in the context of GUI.	[CO3]	[A2]

Part B: 5x11=55 Marks

11	a.	Discuss the impact of human factors like memory and recognition on UI design, citing examples from modern interfaces.	[CO1]	[B1]
		[OR]		
	b.	Explore the relationship between user familiarity and user interface design, providing examples of how this principle enhances user experience.	[CO1]	[B2]

12	a.	Evaluate the effectiveness of anthropomorphic interfaces in engaging users, with real-world examples.	[CO1]	[B1]
		[OR]		
	b.	Describe various models of user interfaces including GUI, WUI, and VUI, and their applications in current technology.	[CO1]	[B2]
13	a.	Compare and contrast the usability aspects of direct manipulation and menu-driven interfaces.	[CO2]	[B2]
		[OR]		
	b.	Analyze the Waterfall and RAD lifecycle models, recommending the most suitable model for rapid software development.	[CO2]	[B2]
14	a.	Discuss the role of task analysis in UI design and how it influences user experience.	[CO2]	[B1]
		[OR]		
	b.	Explain how effective error message design can improve user interactions with a software application, providing examples.	[CO2]	[B2]
15	a.	Explore how user-centered design principles impact GUI development, with emphasis on iterative testing and feedback.	[CO3]	[B2]
		[OR]		
	b.	Discuss the importance of color choice and layout in enhancing user experience within GUIs, supported by relevant examples.	[CO3]	[B2]
